

Ranger Marcy's Acorn Adventure Leaf Art!

Leaf Critters

Let children gather leaves of different sizes to make their own leaf animals. Larger leaves can be used for the body and smaller ones make great ears. You can use small twigs for legs or narrow leaves, whichever you and your child prefer. Leaf critters are fun for kids to make and you can add googly eyes and even frame the critters so that your child can keep them for years to come.

Leaf Butterflies

Children love butterflies and you can create adorable fall butterflies from just a few leaves, some twigs and a few craft supplies. A hot glue gun will hold all of the pieces together. These are really easy to make so they are perfect for toddlers and younger children. Add wiggly eyes and pom-pom balls for decoration and they will look just like real butterflies when you are finished.

Leaf Placemats or Coasters

Decorate your kitchen appliances with beautiful fall leaf placemats or coaster. Have children gather a few leaves and then laminate them to keep them from breaking. These are great for teacher's holiday gifts or to simply decorate your kitchen in the autumn spirit.
